

Pawsome Healing & Protect™ from Secure a Pet RX™

KEY BENEFITS

Natural Shield - Beeswax, Coconut Oil, and Shea Butter create a protective barrier against harmful debris, chemicals, and bacteria, keeping paws safe and healthy.

Instant Hydration - Sunflower Oil and Vitamin E deeply moisturize dry, cracked paws, bringing instant relief and promoting long-term paw health.

Antibacterial Power - Essential oils like Chamomile, Cajeput, and Rosemary effectively combat harmful bacteria, keeping paws clean and healthy.

Soothes Inflammation & Itching - Our gentle formula reduces discomfort caused by irritation or inflammation, getting your dog back to playful romps quickly.

All-Weather Protection - Works wonders in hot and cold weather, on rough terrain, and against ice melt/salt, providing year-round paw care.

Helping Your Furry Friend Enjoy Every Season

Secure a Pet RX™'s Pawsome Healing & Protect™ is the ultimate care balm designed to alleviate your pet's discomfort and provide protection. Imagine a world where every step your dog takes is one of comfort, every sniff is free of irritation, and their skin is a fortress against the elements. That is the world Pawsome Healing & Protect™ promises.

This unique balm was developed by veterinary experts specifically for the renowned **Iditarod Trail Sled Dog Race in Alaska, USA**, held annually in March. The grueling conditions and sub-zero temperatures over **1,500 kilometers necessitated** a solution to ensure the health of their beloved companions.

Crafted with an all-natural, specialty formula, Pawsome Healing & Protect™ acts as a shield against the intrusion of harmful debris, chemicals, and bacteria. It is not merely a balm; it is a guardian, ensuring that your dog's paws, nose, and skin remain pristine and unblemished by the harshness of the environment.

Pawsome Healing & Protect™ is an excellent solution for your pet, whether it is an indoor pet or one that spends a significant amount of time outdoors. Often overlooked for the average pet, the paws, nose, and skin are commonly exposed to harsh environmental conditions, making it crucial to ensure their well-being.

Directions for Use

Adjust amount as needed:

Apply on paws and nose regularly.

Apply on skin "hot" spots as needed.

Cautions: Although considered safe to use in both dogs and cats, should there be any reaction stop product administration and contact your veterinarian.
